

WE LISTEN. WE OBSERVE. WE OPTIMIZE.

NEW

# MINI-RAPTOR VAC<sup>®</sup> VACUUM HOSE ASSEMBLY

31972

Dynabrade's new vacuum hose assembly with overhose and integrated airline surpasses all previous revisions. Its lightweight design with 1" conductive vacuum hose and new adjustable cuffed overhose provides an ergonomic assembly second to none.

- Its fully conductive features allow any electrostatic buildup at the tool to be drawn away from the operator and back to earth ground.
- 1" flexible, ergonomic vacuum hose allows for tight radius functionality.
- Overhose eliminates any workpiece or marring of work-cell floor or surroundings.
- Overhose position is adjustable to meet customized setup needs for both tool and vacuum connections.
- Flexible cut-to-fit airline with reusable fittings allows you to customize assembly length to your pneumatic vacuum tool connection needs.
- Ideal for high-abuse dust collection operations in both horizontal and vertical applications.

QUICK CONNECT TO VACUUM
