# MEGA-RAPTOR VAC®

## MOBILE VACUUM SYSTEMS

Dynabrade's Mega-Raptor Vacs are a performance upgrade from our previous Mini-Raptor offering. These M-Class vacuums feature 2-stage filtration that captures materials down to 0.3 microns. The large 20 gallon capacity leads to fewer bag changes. Powerful enough to simultaneously support two operators with Auto on/off for pneumatic tools. Built in overload protection will shut down system and provides the insurance of intended motor life. Air inlets designed to provide the proper air power to the tools in a pneumatic platform. Auto Filter Cleaning using compressed air blasts through filter every 40 seconds, insuring proper designed flow through the life of the system. Reduced Air Flow indicator prompts filter, hose or bag maintenance. Settings available for single or dual operator efficiency selection. At 73 dBA these vacuums are significantly quieter than previous Mini-Raptor vacuums. Designed only for dry operation.

### MEGA-RAPTOR VAC® STANDARD PACKS

Our standard packs come with a single operator set-up with your choice of a Dynorbital-Spirit® or Dynorbital® Extreme tool and include a standard cart which is compact and easy to maneuver.

**M1010SP STANDARD PACK WITH 59182 DYNORBITAL-SPIRIT®**

## CERTIFIED AUTOMOTIVE VACUUM SYSTEMS

### RAPTOR VAC® WALL MOUNT STYLE DIVISION 1

Model 61470

- 1.5 Gallon
- Designed for dry source capture.
- Includes brackets for mounting to wall.
- Includes HEPA H14 Filter with 99.995% efficiency.

61470

### RAPTOR VAC® BACKPACK STYLE DIVISION 1

Model 61472

- 1.5 Gallon. For general maintenance.
- Designed for dry source capture.
- Includes backpack harness for great mobility.
- Includes HEPA H14 Filter with 99.995% efficiency.

61472

*THESE VACUUM SYSTEMS  
MEET OR EXCEED THE  
CERTIFICATIONS OF  
ALL THE AUTOMOTIVE  
MANUFACTURERS INCLUDING:*

**Jeep**

**RAM**

**HONDA**

### COMPACT ELECTRIC WATER IMMERSION VACUUM SYSTEM

Model 61495

- For safe recovery of metallic dust.
- Recovery capacity of 3 lbs into 7.5 gallons of neutralizing liquid.
- Equipped with easy-glide casters.
- Includes one 20' Conductive Coaxial Hose with Integrated air line.
- Includes HEPA H14 Filter with 99.995% efficiency.

61495

### COMPACT PNEUMATIC WATER IMMERSION VACUUM SYSTEM

Model 61496

- For safe recovery of metallic dust.
- Recovery capacity of 3 lbs into 7.5 gallons of neutralizing liquid.
- Equipped with easy-glide casters.
- Includes one 20' Conductive Coaxial Hose with Integrated air line.
- Includes HEPA H14 Filter with 99.995% efficiency.

61496

### RAPTOR VAC® PNEUMATIC PORTABLE VACUUM SYSTEM

Model 61465

- Collects maximum of 5lbs of dust into 6.25 gallon tank.
- Certified explosion proof.
- Equipped with easy-glide casters.
- Includes one 20' Conductive Coaxial Hose with Integrated air line.
- Includes HEPA H14 Filter with 9.995% efficiency.
